Vin Diesel Arnold - Goodpasture

PET SPOTLIGHT | VIN DIESEL

Family: Arnold - Goodpasture

Vin Diesel was the first born in a litter of 8 kittens! He spent 3 months growing up on a hazelnut farm with his mom and siblings, playing and learning how to be a cat. When we went to pick up our kitten, we were still unsure who we would go home with. When we got to the farm and the only fluffy kitten hopped right into our carrier and started napping, we knew at that point we had been chosen.

Vin Diesel enjoys playing with his feather toys the most. Because of his love for play, we knew that something was odd this January when he couldn't play longer than 5 minutes without panting for breath. We took him in to Hello Vet and he was diagnosed with asthma at only 1 year old. Thanks to the awesome vets Vin Diesel has gotten on a regular medication that has helped him go back to his playful self!

HAPPENING AT HELLO VET:

Big THANK YOU to our clients!

You may have heard that Hello Vet was in the running for 3 different awards from the Corvallis Chamber of Commerce. While we didn't walk away with awards this year, we continue to strive for greatness and want to thank all of you who took the time to nominate us and vote for us. We appreciate each and every one of you!! We couldn't do what we do without YOU and are so grateful for your kind words.

HEARTWORM PREVENTION

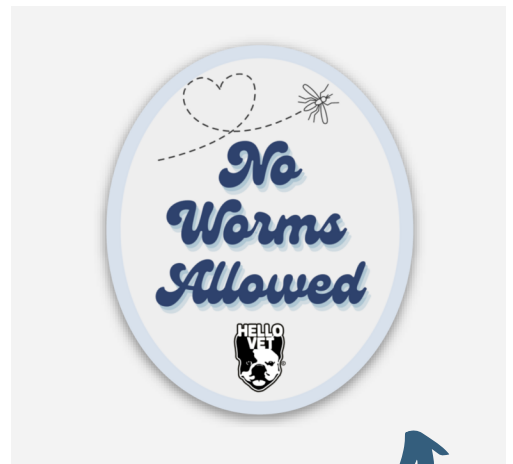

The key to a happy heart!

Heartworm disease is a serious and potentially life-threatening condition that affects dogs and cats. The disease is caused by a parasite that is transmitted through the bite of an infected mosquito. This parasite can develop into adult worms that live in the heart and lungs of an infected animal, leading to heart and lung damage, respiratory distress, and even death.

The good news is that heartworm disease is preventable with regular heartworm testing and preventive medication. We recommend that all pets receive an annual heartworm test to ensure early detection of the disease, even if they are indoor pets or have previously tested negative.

The heartworm test is a simple blood test that can be completed in just a few minutes at Hello Vet. If the test results are positive, prompt treatment is necessary to prevent the disease from causing further damage to your pet's health.

By being proactive and taking preventative measures such as annual heartworm testing, you can help keep your pet healthy and protect them from the serious and potentially life-threatening effects of heartworm disease.

STICKER DROP!

We are excited to announce our new Hello Vet sticker collection! **RAD** stickers for **RAD** pet owners that will drop each month.

Our April sticker is now available at the Hello Vet concierge desk! Stop in and get yours while supplies last!
